Arun M

Industry Mentors Name : Sowjanya, Sandeep Doodigani

Faculty Mentor Name : Ponlatha S

Problem Statement:

In existing, we need to maintain the Excel sheets, CSV etc. files for the user daily and monthly expenses. In existing, there is no as such complete solution to keep a track of its daily expenditure easily. To do so a person as to keep a log in a diary or in a computer, also all the calculations needs to be done by the user which may sometimes results in errors leading to losses. There can be many disadvantages of using a manual accounting system. A manual accounting system requires you to understand the accounting process in a way that may be unnecessary with a computerized accounting system. This can be an advantage or a disadvantage, depending on the person doing the bookkeeping; often, a specially trained professional is needed to ensure that accounting is done properly. To reduce manual calculations, we propose an application. This application allows users to maintain a digital automated diary. Expense Tracker application which will keep a track of Income- Expense of a user on a day to day basis.

Solution:

To reduce manual calculations, we propose an application. This application allows users to maintain a digital automated diary. Expense Tracker application which will keep a track of Income- Expense of a user on a day to day basis.
